Professional Summary

Enthusiastic Software Development Engineer with expertise in Full-Stack Development using React.js, Node.js, and MongoDB. Proven problem solving abilities, demonstrated by solving 300+ DSA challenges on LeetCode. Passionate about building scalable, high-performance web applications and contributing to innovative development teams.

Education

Pranveer Singh Institute of Technology

July 2022 – July 2026

Bachelor of Technology in Computer Science Engineering (AIML)

CGPA: 7.52

Technical Skills

- **Programming Languages:** C++, Python, Java, JavaScript, SQL
- **Web Frameworks / Technologies:** React.js, Node.js, Express, Mongoose, Tailwind CSS
- **System Design and Distributed Computing:** API Design, Microservices, Load Balancing, TCP/IP
- **Databases:** Oracle SQL, MongoDB
- **Operating Systems:** Unix/Linux (CLI, Shell Scripting)
- **Cloud and DevOps Tools:** AWS (EC2, S3), Docker (Basic), Postman, Git, GitHub
- **Relevant Coursework:** Data Structure and Algorithm, Operating System, DBMS, OOP, Machine Learning Basics

Projects

Smart Spend | [GitHub Repository](#)

December 2024 - Present

- Developed a full-stack financial management platform for budgeting, expense tracking, investment planning, and income tax calculation with secure JWT authentication and ensured robust **REST API** performance with comprehensive testing via Postman.
- **Impact:** Empower users with better financial literacy and decision-making, leading to better budgeting and investment strategies.
- **Key Features:** Expense tracking, financial goal setting, secure authentication (JWT) and an income tax calculator.
- **Tech Stack:** React.js, Node.js, Express, MongoDB, Mongoose, Tailwind CSS, AWS (EC2, S3).

Megablog | [GitHub Repository](#)

July 2024 – August 2024

- Built a scalable blogging platform with React and Appwrite, enabling seamless content creation and sharing.
- **Impact:** Enhanced user engagement and content reach, allowing people to share ideas effortlessly.
- **Key Features:** User authentication, rich text/image posting (TinyMCE), secure media uploads, and responsive UI.
- **Tech Stack:** React.js, Appwrite, Tailwind CSS, React-hook-form, **React-Redux**, TinyMCE

To-Do List Application | [GitHub Repository](#)

March 2024

- Designed a responsive task management app with Context API and Redux, enabling efficient task organization.
- **Impact:** Improved personal productivity and time management by offering a structured way to track tasks.
- **Key Features:** Task creation, editing, deletion, and persistent state management.
- **Tech Stack:** React.js, **Context API**, **React-Redux**, Tailwind CSS.

Achievements

- Solved **300+** DSA Problems on Leetcode | [Profile Link](#)
- Hackerrank: **6 Star** in Problem Solving
- **2nd Rank** Holder in College Internal Hackathon

Certifications

- Developing Back-End Apps with Node.js and Express | [Coursera](#)
- Complete Web Development | [Udemy](#)
- AWS Cloud Practitioner Essentials | [Amazon AWS](#)
